↑ Improving

Period start: 66.1

Active drivers	35
Total miles (period)	1,624,875
Reporting period	Dec 30, 2025 – Jun 30, 2026
Median driver-week miles	1,605

Risk concentration: The 5 highest-risk drivers account for 56% of severity-weighted safety events fleet-wide. Coaching and accountability should focus on this group first.

Fleet Rolling Score — 6-Month Trend

Scores: $100 \times \exp(-\text{severity-weighted events per 1,000 miles} / 138)$. Full methodology and weights available on request.

Where the Risk Lives

Geographic and operational risk patterns | Dec 30, 2025 – Jun 30, 2026

Weighted Event Rate by Corridor (per 1,000 mi)
Highest rates: I-55 North & I-80 East

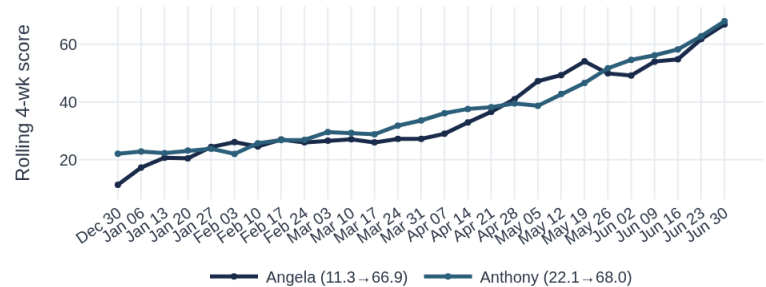

Shift Comparison (per 1,000 mi)
Night rate $\approx 1.9 \times$ day

Coaching Works

Coached Improver — Rolling Score Trajectories

Angela Cohen — rolling score 11.3 → 66.9 (+55.6 pts over period)

Anthony Gonzalez — rolling score 22.1 → 68.0 (+45.9 pts over period)

Top Recommended Coaching Actions

1. Schedule and fatigue review — night-shift weighted event rate is $1.9 \times$ day shift.
2. Route-specific safety briefing for I-80 East and I-55 North ($2.0 \times$ mean of other corridors).
3. Device-policy coaching for the 8 drivers who account for nearly all mobile-usage events.
